AUTOMATIC LICENSE PLATE RECOGNITION (ALPR) SOLUTIONS

Your Smart and Reliable Eye on the Roads

Quickly locating vehicles of interest is crucial for solving cases and preventing crime. But, without accurate data, you may be left relying solely on eyewitness accounts, which can slow down investigations.

UScellular® ALPR solutions are your ally in speeding up this process. Our easy-to-deploy hardware, combined with a user-friendly platform delivers real-time notifications on vehicles of interest, helping you enhance public safety and maintain your community's trust.

UScellular® ALPR Benefits

FIND SUSPECTS

Narrow down suspects and resolve cases faster using filters such as plate, color, make and more to locate crucial evidence.

INSTALL EASILY

Stay ahead of threats by rapidly deploying or relocating our self-powered hardware to new crime hotspots within minutes.

RESPOND FAST

Accelerate suspect identification by effortlessly toggling between views and applying filters to tailor data viewing.

INTERRUPT CRIME

Apprehend suspects easier with proactive vehicle and license plate alerts that arrive the moment a suspect vehicle is spotted.

ELIMINATE HASSLES

Get warranty, hardware, software, training and services up and running fast, bundled into one easy subscription fee.

MAINTAIN VIGILANCE

Get continuous surveillance that delivers clear, actionable data under any weather conditions, day or night.

70%
of crimes involve a motor vehicle[1]

33
the number of seconds between car thefts in the U.S.[2]

30%
of stolen vehicles are used in other crimes[3]

Are You Capturing All Necessary Vehicle Evidence?

The challenge of rapidly locating vehicles of interest is amplified when officer resources are limited. This increases the chances of criminals slipping through the cracks.

The UScellular ALPR vehicle-focused investigation tool is designed to provide you with critical vehicle data to significantly cut down the time and resources spent on chasing leads.

Capture vehicle type, color, make, model and license plate information from anywhere, regardless of weather conditions or time of day. Additionally, with its cloud-based software paired with battery and solar-powered hardware, there's no need for on site power or extra infrastructure, making re-deployment quick and easy.

Why UScellular for ALPR Solutions

Choosing UScellular is about more than just an ALPR solution. It's about investing in a reliable partnership focused on delivering real value and peace of mind.

Our fast and dependable nationwide network and priority services are built to keep you connected, especially when it matters most. In areas other carriers ignore, we serve, ensuring you're connected and operational even in the most remote and challenging locations. Also, unlike larger carriers, you're not just getting a service, you're gaining a trusted partner. Together, we can contribute to a safer community.

Reduce Caseloads and Improve Clearance Rates with:

VEHICLE HOTLISTS

Receive immediate notifications by utilizing local hotlists or uploading your own, whenever there's a hit on the suspect's vehicle.

END-TO-END SECURITY

Get robust data security from hosting in a government-approved cloud, adhering to government information security standards

EXTENDED NETWORK

Stay ahead of criminals by connecting with local hotlists and the NCIC, going beyond your own camera data for a wider perspective.

How License Plate Recognition Works

Vehicle Information is captured by the camera

The data is securely sent via the UScellular Network

Image and data is delivered via a web-based portal
